

Tooling University provides products and services that address some of the most critical skill and capability requirements of today's global manufacturing workforce.

Assess your training needs and identify knowledge gaps using pre-training diagnostic tools.

Train your employees using job-related class content in a self-paced, interactive learning environment.

Measure the improvement in your employees' knowledge and skills with powerful administrative tools and reports.

Quality/lean managers are responsible for the continuous improvement of manufacturing processes, the quality assurance of products, and the elimination of waste and inefficiency. This position requires a knowledge of inspection methods and metrology processes, ISO 9000 and similar quality standards, statistical process control, and lean metrics and approaches. Quality/lean managers also benefit from a broad understanding of common manufacturing processes.

This program contains all of the 62 classes below:

- Intro to Abrasives 100
- What Is Grinding? 110
- Grinding Processes 120
- History and Definition of CNC 100
- Mechanics of CNC 110
- Basics of the CNC Turning Center 120
- Basics of the CNC Machining Center 130
- Basics of the CNC Swiss-Type Lathe 135
- CNC Coordinates 140
- CAD/CAM Overview 160
- Intro to Assembly 100
- Intro to Fastener Ergonomics 130
- Basic Measurement 110
- Linear Instrument Characteristics 115
- Basics of the CMM 120
- Surface Measurement 140
- Intro to GD&T 200
- Calibration Fundamentals 210
- Hardness Testing 260
- Measuring System Analysis 300
- Interpreting GD&T 310
- Basics of the Manual Mill 110
- Basics of the Engine Lathe 115
- Intro to Materials 100
- Mechanical Properties of Metal 120
- Metal Manufacturing 140
- Metal Removal Processes 110
- What Is Cutting? 120
- Machines for Metal Cutting 130
- Cutting Processes 140
- Quality Overview 100
- ISO 9000 Overview 110
- Approaches to Maintenance 120
- Lean Manufacturing Overview 130
- Intro to Supply Chain Management 140
- Total Productive Maintenance Overview 150
- Cell Design and Pull Systems 160
- Intro to Six Sigma 170
- Conducting an Internal Audit 200
- SPC Overview 210
- TS 16949:2002 Overview 220
- Metrics for Lean 230
- Process Flow Charting 240
- Strategies for Setup Reduction 250
- Conducting Kaizen Events 260
- Six Sigma Goals and Tools 310
- Intro to OSHA 100
- Fire Safety and Prevention 110
- Bloodborne Pathogens 115
- Personal Protective Equipment 120
- Lockout/Tagout Procedures 130
- Environmental Safety Hazards 150
- MSDS and Hazard Communication 160
- Basics of Tolerance 120
- Blueprint Reading 130
- Statistics 220
- Press Basics 110
- Punch and Die Operations 120
- What Is Arc Welding? 110
- Arc Welding Processes 120
- Intro to Workholding 104
- Supporting and Locating Principles 106
